

### Playground Site Pros

- Safe and secure feeling
- Immaculately clean
- Protective fence
- Vicinity to other civic uses
- Seems well used--children always playing

### Playground Site Cons/Improvements

- \*Needs more versatility\*
  - The playground seems to cater to a very narrow age range and would be outgrown by a 4-yr old. By adding a mix of equipment such as monkey bars and swings for older children, the marketability and appeal of the playground expands. This versatility also includes amenities for mothers/caregivers, such as more socially structured benches, sun shades/umbrellas, waste bins, and bike racks.
- Make chain-link fence less utilitarian
- More lighting after dark
- Need to get input from mothers of young children/people who actually use the playground

### Other general suggestions/comments (beyond playground)

- Add a dog park
- Hold outdoor yoga/tai chi/qi gong
- Picnic tables
